## About Us

WJM International specialises in supply chain procurement and on-demand equipment, components, electrical consumables and maintenance products.

We have a growing customer base in a number of different territories including Europe, The Middle East, South America and Caucasasia.

Having supplied for many years to large end user and consumers alike, we are well placed to quote, supply, ship and recycle your inventory.

Our aim is to supply components, equipment and spare parts at the best possible price, but also to provide excellent quality of service to our customers, who often require flexible, tailor-made solutions.

This brochure is intended to outline our most popular lines of products and brands that your business may wish to purchase.

## Supply Chain

We can support your supply chain and manage your critical goods inventory.

## Cost Savings

No need to employ a large internal team when you can outsource your procurement on demand.

## Supplier Relations

Let us manage your day-to-day supplier communication. Save time and money by not registering suppliers for one off purchases.

## Strategy

We can seamlessly integrate with your turnaround teams to ensure preventative and planned maintenance is ready when you are.

## Logistics

We can check, pack and ship anything to anywhere in the world using a full range of carriers and methods.

# 10 Years of experience

Over the last 10 years we have perfected our approach to Supply Chain and Procurement.

Having designed bespoke management software, we can work quickly and accurately to serve your needs utilising the latest technology and effective communication.

Communication is our biggest asset and with over 1000 customers worldwide, we are confident that we have a service that will suit your business needs.
